Question Breakdown:

Question 1: Which of the following is NOT an example of an input device?

Your Answer: Printer (Correct ■)

Correct Answer: Printer

Difficulty: easy

Question 2: Which of the following best describes the function of a CPU cache?

Your Answer: A component of the motherboard responsible for managing power consumption. (Incorrect ■)

Correct Answer: A type of RAM that stores frequently accessed data for faster CPU retrieval.

Difficulty: medium

Question 3: Which of the following is NOT an example of an input device?

Your Answer: Monitor (Correct ■)

Correct Answer: Monitor

Difficulty: easy

Question 4: Which of the following best describes the function of a CPU cache?

Your Answer: A software program that manages the allocation of system resources. (Incorrect ■)

Correct Answer: A type of RAM that stores frequently accessed data for faster CPU retrieval.

Difficulty: medium

Question 5: Which of the following is NOT an example of an input device?

Your Answer: Printer (Correct ■)

Correct Answer: Printer

Difficulty: easy

Question 6: Which of the following best describes the function of a computer's CPU (Central Processing Unit)?

Your Answer: To store long-term data and programs, providing persistent memory even when the computer is powered off. (Incorrect ■)

Correct Answer: To process instructions and perform calculations, acting as the 'brain' of the computer and executing software code.

Difficulty: medium

Question 7: Which of the following is NOT an example of an input device for a computer?

Your Answer: Microphone (Incorrect ■)

Correct Answer: Printer

Difficulty: easy

Question 8: Which of the following is NOT an example of an input device?

Your Answer: Printer (Correct ■)

Correct Answer: Printer

Difficulty: easy

Question 9: Which of the following best describes the function of a CPU cache?

Your Answer: A component responsible for translating high-level programming languages into machine code. (Incorrect ■)

Correct Answer: A temporary storage location for frequently accessed data, improving processing speed by reducing access times to main memory.

Difficulty: medium

Question 10: Which of the following is NOT an example of an input device for a computer?

Your Answer: Mouse (Incorrect ■)

Correct Answer: Printer

Difficulty: easy
